

## Release Notes

No	Module / Function	Version	Type of adjustment	Release Notes
4168	Basic	v2026.2	Feature	New workflow add-on action implemented for the Azure OpenAI service. This allows prompts to be sent based on existing form fields. Configuration is carried out by IMS in the standard add-on settings. At the same time, it is now possible to format text fields as Richtext or Markdown.
4317	Basic	v2026.2	Modification	It has been ensured that measures can be migrated during a CIP migration.
4436	Basic	v2026.2	Improvement	The performance of the search index queue service has been improved when there are no objects in the queue.
3309	Business Process Engine	v2026.2	Fix	It has been ensured that the information in the open confirmation register is correct regardless of the status of the document (draft/final).
1481	Content Documents	v2026.2	Improvement	It has been ensured that “Changes since the last version” can be entered on an object when rich text mode is enabled.
385	Cubes	v2026.2	Improvement	The Cockpit Editor feature for creating a personal cockpit in the Cube settings has been removed as it is no longer needed.
3424	Documents	v2026.2	Fix	An issue with updating DocProperties after changing the from/to date fields on a final version has been fixed.
4188	Documents	v2026.2	Fix	It has been ensured that in shared documents in mixed document groups, the documents are displayed before the document groups. If the preferred sorting order is set to system order, the documents can be sorted among themselves and the document groups among themselves. A mix is not possible. If the preferred sorting order is set to name, neither documents nor document groups can be sorted.
4001	Modeler	v2026.2	Fix	An issue with scrolling using the mouse wheel during text entry has been fixed in the process modeler.
4145	Modeler	v2026.2	Improvement	It has been ensured that the graphic and description are displayed correctly in a task list based on the selected topology, both in the view and in the PDF.
2204	Modeler	v2026.2	Improvement	Performance when loading the sidebar in the process modeler has been improved.
2206	Modeler	v2026.2	Improvement	Different aspects of the modeler have been improved: - The drag & drop area for adding jobs has been reduced in size - A clearer icon has been chosen for the “Add new connection” action - The “Add new connection” action is now only displayed in one place - Versioned

				substructures are marked with a “V” - Different icons are used for linked/unlinked inputs and outputs
4420	Object Management	v2026.2	Fix	It has been ensured that the “Include in search index” flag is taken into account not only in object management trees, but also in object management tables.
4300	Object Management	v2026.2	Improvement	The performance for the object management tree has been improved.
795	PDF Creation	v2026.2	Improvement	The first page of the workflow pdf has been improved. There is no overlap or missing information anymore.
4249	Process	v2026.2	Fix	An issue where logos in a document were not updated when the document group was set to tree view has been fixed.
4406	Process	v2026.2	Fix	An issue where the swimlane graphic was displayed incorrectly due to an empty column has been fixed.
4365	Process	v2026.2	Fix	An issue where the process phase names were no longer displayed in the Standards and Laws tab has been fixed.
4247	Reporting	v2026.2	Fix	An issue that prevented the correct number of search results from being displayed on the process execution analytics page has been fixed.
3520	Reporting	v2026.2	Fix	It has been ensured that all results are loaded in the control definition analytics page when the "Check based" checkbox is selected.
3655	Search	v2026.2	Fix	An issue in shared documents preventing access to a valid document with a pending draft has been fixed.
4205	Standards and Law Management	v2026.2	Fix	An issue where creating a Law Chapter without a name and assigning it to an IMSObject triggered a missing renderer error has been fixed.
4356	Workflow	v2026.2	Fix	An issue where the workflow wizard wasn't displayed has been fixed
1095	Workflow	v2026.2	Fix	An issue with the display in the workflow slider when permissions are set on outputs has been fixed.
4398	Workflow	v2026.2	Fix	An issue affecting the validation of rules for creating new sub-objects in specific workflows has been fixed.
4438	Workflow	v2026.2	Fix	It has been ensured that the permission check works correctly for a step with different responsible parties and is not changed by the workflow trigger service.
