

Release Notes

No	Module / Function	Version	Type of adjustment	Release Notes
4671	Assessments	v2026.3	Fix	An issue in which an assessment could not be deleted because it served as the basis for another assessment has been fixed.
4782	Basic	v2026.3	Fix	An issue where document owners were no longer receiving reminder emails has been fixed.
3990	Basic	v2026.3	Improvement	It has been ensured that users are automatically redirected to the home page after the IMS session expires due to prolonged inactivity.
865	Basic	v2026.3	Improvement	Opening objects from Cubes or via the navigation bar has been improved. Objects with tree structure always open in a new tab to make the best possible use of available space.
4277	Basic	v2026.3	Feature	The IMS manuals are gradually being replaced by online help. The online help can be accessed via the ? icon, just like manuals.
4573	Basic	v2026.3	Improvement	With the new workflow addon-action "Set Form Fields," it is now possible to fill in a document's form fields with a predefined value. Supported fields: valid from, valid to, description, reasonforedit. Note: must be configured by IMS
4121	Business Process Engine	v2026.3	Improvement	An improvement has been made for manual e-mails from process executions. This prevents unnecessary line breaks in the text.
1405	Business Process Engine	v2026.3	Improvement	It has been ensured that the system returns to the parent object after closing sub-objects.
4496	Cubes	v2026.3	Modification	It has been ensured that the info text in the news cube is always in the user language.
4670	Documents	v2026.3	Fix	It has been ensured that additional languages can be added to a document type "Unversioned link".
4515	Documents	v2026.3	Improvement	It has been ensured that during the version update all fields are copied first and only then are dependencies checked.
4604	Documents	v2026.3	Fix	A rare issue in which workflow fields could be modified on a finalized document has been fixed.
4443	Dynamic Forms	v2026.3	Improvement	It has been ensured that the Tab key cannot be used to navigate to a non-editable field.

4643	Modeler	v2026.3	Modification	There was an issue where, in standard processes in the Modeler, the position of a task could change when switching contexts. As a result, only the "Manual" option is now available for standard processes in the Modeler, since different topologies cannot be technically supported when multiple map contexts are used. This change has no impact when working without the Modeler.
57	Modeler	v2026.3	Improvement	It has been ensured that unit-specific and general jobs, document groups, and tools are always updated correctly in the modeler sidebar.
4298	Modeler	v2026.3	Feature	With the new setting "Svg Connection Display = Numbered," it is possible to number the output labels in the graphic within a task list and display the corresponding legend in the description column. This applies to both the view and the PDF. This resolves the issue of truncated output names when they are too long.
4558	Performance	v2026.3	Improvement	A way has been added to improve performance in the "resolved roles" section.
3352	Reporting	v2026.3	Fix	An issue in which too many results were displayed in the Risk Catalog Analytics has been fixed.
789	Reporting	v2026.3	Improvement	It has been ensured that all fields are shown when toggling columns on or off on the Analytics results page.
2457	Workflow	v2026.3	Fix	An issue where the content of dynamic workflow fields with a preset reference to themselves was not transferred correctly to the next version has been fixed.
4262	Workflow	v2026.3	Fix	An issue in which placeholders for a process execution name could not be resolved when the user's content language was not set has been fixed.
4813	Workflow	v2026.3	Fix	An issue in which the workflow trigger advanced the workflow even though the "Must have subobjects" mode was enabled for that step has been fixed.
4543	Workflow	v2026.3	Fix	An issue in which a new interval was started for a deactivated object has been fixed.
4518	Workflow	v2026.3	Improvement	It has been ensured that the confirmation form can be edited in a draft document version.
4554	Workflow	v2026.3	Improvement	It has been ensured that reminder emails are generated for all versions of an object if needed.

4672	Workflow	v2026.3	Improvement	It has been ensured that only valid documents are included when copying documents from the workflow to the process execution.
